Press Release

Collaboration agreement between Micron Inc. and Keosys S.A.S

Micron Inc. (Henceforth “Micron”, CEO: Makoto Sato, Headquarters: Chiyoda-ku, Tokyo, Japan) and Keosys S.A.S (Henceforth “Keosys”, CEO: Jérôme Fortineau, Headquarters: Saint-herblain, France) have entered into collaboration agreement regarding international collaborative imaging clinical trials.

Micron has established an environment to implement many multicentre imaging clinical trials, especially in Asian countries, such as Japan and Korea. Under this comprehensive collaboration with Keosys, which has a great experience with IT platform for imaging, we will be able to broaden our services to handle multinational, multicentre clinical trials, including Europe and the U.S.

Micron has strength in the field of standardization of image acquisition techniques, ensuring high quality of image collection for reliable image reading, and smooth imaging clinical trial operation based on accumulated know-how. As an imaging central lab, our performance has been approved by many pharmaceutical companies with a lot of imaging clinical trials with global standard quality.

Keosys draws on state-of-the-art technology with the development of a global medical imaging infrastructure for clinical trials. This full cloud-computing imaging platform optimizes centralization, Web-based visualization and assessment of imaging data, Keosys Web Imaging Management System can be deployed for any imaging trials whatever the therapeutic areas are. Thanks to this innovative technology and its expert partners' network, Keosys controls the management of the whole imaging process of clinical trials and establishes itself as a privileged imaging provider near significant sponsors and actors of academic clinical research institutions.

Micron and Keosys will rely on each other's imaging network, expertise, and capabilities to offer global imaging services to sponsors based in Asia, Europe, and North America. Micron and Keosys will gain strength by sharing knowledge, skills, and local business culture for successful collaboration. Sponsors will benefit from this new

partnership that will focus on local services to build close relationship and business confidence. We have already started preparation for several multinational, multicentre clinical trials, as a collaboration project.

Micron, an Asian leading imaging CRO, and Keosys services in imaging clinical trials in the world will be strengthened , by actively mounting an effort to improve standardization of image acquisition techniques and systemization of environment, along with the characteristics of each country,

Company Information

Micron, Inc.

Establishment: 3rd October, 2005

Headquarters: Tokyo, JAPAN

Representative: Makoto Sato, CEO

Main services: Imaging related technical support and clinical trial support

Keosys S.A.S

Establishment: January 12th 2001

Headquarters: Saint-Herblain , FRANCE

Representative: Jérôme Fortineau, CEO

Main services: Clinical trial and clinical routine support for medical imaging with an integrated image analyzing system
