Press Release

Collaboration agreement between Micron Inc. and Biomedical Systems

Micron Inc. (Henceforth “Micron”, CEO: Makoto Sato, Headquarters: Chiyoda-ku, Tokyo, Japan) and Biomedical Systems (Henceforth “BMS”, CEO: Tim Barrett, Headquarters: Saint Louis, USA) have entered into collaboration agreement regarding international collaborative imaging clinical trials.

Biomedical Systems has engaged Micron to partner in providing support to sponsor and CRO clients in clinical trials utilizing Japanese medical imaging corelabs. Micron offers internal experts, multi-facility support, quantitative and qualitative analysis, and dedicated services including image acquisition manuals and image data quality control. Imaging clients will be able to leverage Micron’s Scientific Advisory Board comprised of academic and regulatory experts with requisite clinical and industry experience in the Japanese market. Biomedical Systems will support these services with a global infrastructure, project management expertise, and a network of international physician readers skilled in conducting large global clinical trials.

Micron’s strength in the field of standardization of image acquisition techniques ensures a high quality of image collection for reliable image reading, and smooth imaging clinical trial operation. Micron is the approved and preferred Japanese central imaging central lab for many top pharmaceutical companies providing the standard for global quality. Biomedical Systems and Micron will work collaboratively to improve access to the Asia Pacific market, transparency in clinical trial data and processes, and efficient project management of large scale global clinical trials, offering an accelerated pathway to cost-effective, high quality imaging data.

Biomedical Systems is a worldwide provider of centralized clinical trial services and cardiac monitoring solutions. Since 1975, Biomedical Systems has supported pharmaceutical and biotech companies, academic institutions, and CROs with clinical trial solutions including cardiac safety, pulmonary function, scientific affairs, medical imaging, neurophysiology, digital pathology, and electronic patient reported outcomes.

Company Information

Micron Inc.

Establishment: 3rd October, 2005

Headquarters: Chiyoda-ku, Tokyo, JAPAN

Representative: Makoto Sato, CEO

Main services: Imaging related technical support and clinical trial support

Biomedical Systems

Establishment: 1975

Headquarters: Saint Louis, USA

Representative: Tim Barrett, CEO

Main services: Clinical trial services and cardiac monitoring solutions
