

Collaboration agreement between Micron, Inc. and Research Dx

Micron Inc. (Henceforth “Micron”, CEO: Makoto Sato, Headquarters: Tokyo, Japan) and Research Dx (Henceforth “RDX”, Principal: Philip Cotter, Headquarters: Irvine, USA) have entered into collaboration agreement regarding international collaborative clinical trials.

Micron has established an environment to implement many multicentre imaging clinical trials, especially in Asian countries, such as Japan and Korea. Under this comprehensive collaboration with RDX, we will be able to broaden our services to handle multinational, multicentre clinical trials beyond Asia, including the United States of America and expand our analysis services in clinical laboratory and diagnostics.

Micron has strength in the field of standardization of image acquisition techniques, ensuring high quality of image collection for reliable image reading, and smooth imaging clinical trial operation based on accumulated know-how. As an imaging core lab, our performance has been acknowledged by many pharmaceutical companies in a wide array of imaging clinical trials and global standard quality.

ResearchDx is the leading Contract Diagnostics Organization serving the biopharmaceutical and diagnostic industries. The company provides comprehensive, integrated, and flexible services for the *in vitro* diagnostic development process. From initial assay conceptualization, discovery, optimization, and validation in a CAP/CLIA laboratory environment through a complete set of clinical research services and regulatory approval, ResearchDx offers solutions to meet customers' complex needs in diagnostics development. ResearchDx's primary service areas include assay research and development, clinical laboratory services, clinical research, diagnostic manufacturing, and consulting.

Company Information:

Micron, Inc.

Headquarters: Tokyo, Japan

Representative: Makoto Sato, CEO

Main services: Imaging related technical support and clinical trial support

Research Dx

Headquarters: Irvine, USA

Representative: Philip Cotter, Principal

Main services: clinical laboratory services, clinical research, diagnostic manufacturing, and consulting.
